THORSE RACING and balloon a

Locust Point.

IT looks as if the Bellaire tobacc warehouse might not have much business to do, owing to arrangements made and making by the Baltimore & Ohio road at

THE Washington & Waynesburg narrow gauge is still selling its first mortgage bonds, and now offers a third lot at 50

cents. It says that if some system o relief is not speedily inaugurated, bankruptcy stares producer, refiner and oper

### Republican Committees.

There has been some inquiry made in regard to a Republican Congressional or ganization in this district in the coming canvass. The following gentlemen com-prise the committee, viz: Geo. Edwards, of Marshall county, (Chairman); B. Haymond, of Harrison; A. W. Campbell, of Ohio; Geo. Ross, of Lewis, and George Loomis, of Wood.

The State Republican Committee 18 as follows: T. H. Logan, J. T. Hoke, G. W. Atkinson, D. H. Willard, J. S. Cunning-ham, C. C. Gole and A. W. Campbell. W. J. W. Cowden, of Wheeling, is Secretary of the Committee.

### Iron and Nails.

Iron and Nails do not improve at Pittsburgh. The Manufacturer of yesterday says that the pig iron market is in a quieter condition now than at any time within the last five years. In regard to nails, it says that

mails, it says that

"All the nail factories here, with possibly one exception, are idle, and will doubtless continue so for a considerable period. It is also stated that most of the factories at Wheeling are doing nothing. There is no money in making nails at the prices prevailing, and it is likely that very few will be made until there is a better demand. It is doubtful if the business was ever in such a bad condition before. The nominal price is \$2.25, 60 days, 2 per cent off for each, with ten cents abstement on carload lots, but we hear of sales as low as \$2.10. This is only 2.1 cents a pound, which is only two-tenths more than good bar iron brings! It is certainly a good time to buy."

Old rails are quoted at \$20 to \$21 per Old rails are quoted at \$20 to \$21 per

## MOUNDSVILLE.

Commencement Exercises at the Graded and Normal School. Moundsville, June 21, 1878.

Correspondence of the Intelligencer.

Our town was favored with a real Com mencement on the evening of the 20th of June 1878. Our school for the last five years has been conducted by Prof. F. H. Crago, and during that time no school in the State has made greater advance ment than has the Moundsville Graded and Normal school. I desire also to note that the Professor has been very ably assisted by E. Bonar, E-q., Musa Maggie McGaw, Miss India Evans, Miss Mary Peck, Miss Lizzie Sloan and Miss Adie Wallace all of whom are very able and

I did not have the pleasure of attending the examinations at the close of the school, but those who were present say that they were very interesting and in-

would give but a very poor idea of the character and extent of the performances.

At 8 o'clock P. M., the time at which the performances were to commence, the School Hall, which is quite large and commodious, was literally packed with people. The exercises were opened with prayer by Rev. J. S. Pomeroy.

The Salutatory was delivered by Miss Amands Roberts and was a very appropriate address, and was a very appropriate address, and was well received by the audience though not delivered in as loud a tone as it should have been. The next was an essay by Miss Laura Floyd; subject "Progress of Science." This was a very able essay and showed considerable thought. This was followed by a recitation; subject, "Mary Queen of Scots," by Miss Ada Wyrick, which was well received.

A Variation of Control of

The next was an oration by Mr. M. P.

tains one hundred and fifty seven pages of closely printed matter with Sunday School statistics from all parts of this we think, was the best performed piece of the evening.

Miss Nannie Hendershot read an essay entitled "Our object in life," which gave some good advice to both young and old, and was well received by the audience. The class performance was closed by Mr. A. N. Warden, who delivered the valedictory, which was highly complimented by all present. The diplomas were then delivered to the class by Prof. W. M. Wirt, county Superintendent, in a neat and interesting little speech, which was followed by a very interesting address by the Principal, Prof. F. H. Crago. We noticed on the roastrum during the performance many of our prominent citizens. After the performances were over Prof. A. Love, by request, came forward and entertained the audience with two songs in his usual plessant manner, in one of which he was assisted by Mrs. Love. The evening's performance was rendered more enjoyable by Bryson's band, which for nished some excellent music. The exercises closed with prayer by Rev. J. M. Warden. All present expressed themselves as being very well plessed with the evening's exercises.

The industry. These descriptionally fines and towell the sublinest of this good and content of the picked on the day of ablinest. Mey like the picked on the day of the picked on the d

Incidents of the Boat Race on Thursday.

Pools were sold all afternoon at two or three stands upon the course, but scarcely any large ones were disposed of. A few went off at \$100 to \$70, but a majority were little fellows at \$10 to \$8, \$12 to \$9, were little fellows at \$10 to \$8, \$12 to \$9, \$12 to \$10, and such figures. There was fair amount of private bets on the result in sums not exceeding one hundred dollars, at the odds given all along. Hanlan never lost the call in the pools since the time the first once were sold. The most notable betting feature yesterday was a wager made by Mr. Lindsay, the elderly cattled-ealer who cut such a conspicuous figure among the Kanucks. He offered one thousand to five thousand that Morris would never show to the front in the race. A pool was made up by Pittsburgh parties, and the bet was taken. Five thousand dollars more of Pittsburgh money thus went home with the Canadian party. party.

party.

THE START

cents on the dollar. This looks like a pretty expensive way of getting out of debt.

According to the Barnesville Enterprise, Mr. Joseph Close, of St. Clairsville, and Mr. S. Horkheimer, of Wheeling, are buying wool at from 32 to 33 cents over in the neighborhood of Beallsville and Malaga.

THE Bellaire Leader should not throw stones at Republican candidates, in the way of "shent per shent" disparagement, remembering the weakness of Ross in that line. He is supposed to be the boss shent per shenter in this region.

Strowell's Petroleum Reporter takes a gloomy view of the oil market. It says that the production of crude has been largely increased this year and the value of the product has been correspondingly depressed. The increase in barrels thus far has been about 1,335,884, and the decrease in price about \$110 cents. It says that if some system of relief is not speedily inaugurated, bank-relief is not speedily inaugurated in the production of c

the latter half of the second mile. At no other time in the race did be exceed twenty eight strokes, and on the last mile he made but twenty-seven. So far as description of the contest is concerned there was no goom for it. Morris pulled a splendid race, but he was utterly unequal to the requirements. At Powers run, on the down trip, the Canadian boy was not less than six lengths in front. At the turning boat there was about four lengths between the men, both going around very neatly. This was maintained until the last bend in the river on the way home, when Morris began to close the breach. At the foot of the lane he was not above two lengths in the rear, but this was widened a little in the rest of the distance. Hanlan slackened his pace a little in the last fifty yards, and finished about a length and a half front in

THIRTY-REVEN MINUTES,

official time, which, considering the condition of the course, especially the rapidity of the current, is set down by sporting men as very extraordinary time.

"He don't know the course, eh?" said, satirically, a hundred people to their doubting friends, as Hanian pulled along in the very best channel. The fact was that Morris hadn't the river for this five miles "finer down," even by a degree, than had the Canada oarsman. had the Canada oarsman.

had the Canada oarsman.

As soon as the race terminated the men shook hands and pulled to their respective boat houses, where they were cared for in the best way. Morris was evidently fatigued, but not worn out by any means. Hanlan appeared the fresher of the two, and pulled gracefully to his quarters where he was warmly congratulated.

The time was warmly distinct.

The time was variously disputed by outsiders. There were some watches which made it 39 and others which put it as low as 36. Wm. Coates, one of Morris' friends, asseverated most positively that it could not have been less than 38. However, it is highly probable that the official record was very close on time. Mr. Loudin, the referee, declared that the race, which he had witnessed from all points, was the prettiest he had ever seen. In common with all the Canever seen. In common with all the Can-ada men, however, he was confident that the "boy," as they call Hanlan, wasn't pushed in this race and never had been in any he had rowed.

Washington County News-Crop Prospects-Wool Matters.

Sahington Pa , Observer.

Corn is exceedingly short for the season, but all growers report a good stand which is the main point.

Hindman Andrew bought up a drove of hogs last week at \$200 per hundred. Quite a number of families have set apart next Sunday to commence on their peas and young potatoes.

J. C. Vankirk sold a fresh cow and calf for \$30. This indicates that the prices on cows have reached "hard-pan." Such a cow would have commanded \$70 in times of inflation.

structive.

The examination of the school proper took place on . Wednesday, June 19th. Classes from each of the rooms were examined. The examination of the graduating class took place on the 20th of June (Thursday). The examination was sery highly spoken of by all who attended.

The commencement exercises of the class took place on Thursday evening, and to say that they were very good would give but a very poor idea of the character and extent of the performances.

At 8 o'clock P.M., the time at which the performances were to commence, the

A VALUABLE VOLUME.—The report of The next was an oration by Mr. M. P. Sigafone; subject, "the Indian," which is a very good selection, but was not delivered with quite force enough.

Next on the programms was the recitation of "Curfee" must not ring to Night," by Miss Alice Sawyers. This we think, was the best performed piece of the evening.

THE ART OF PROLONGING

People generally desire long life and good health. Nickness and premature death are almost always due to violations of the laws that govern our physical being, and of which the masses are ignorant. If men knew better they would do better, but how can they avoid an evil that they know not of? While efforts are made through the public schools to give each child a so called common English education, yet the children are permitted to grow up and enter upon the responsible duties of active life, profoundly ignorant of the structure of their own bodies, and the laws of physical being upon which their health and lives depend. They are sent to school and crammed with arithmetic, grammar, and geography, by teachers who, in many instances, have never studied physiology and hygiene. They are sent of foreign countries, but are never taught to locate the mountains and trace the rivers of foreign countries, but are never taught to locate the yital organs and glands of their own bodies, or trace veins, arteries, and nerves, in their various ramifications. They are instructed in the flow of the tides, and the course of the coean currents, and the philosophy of winds and storms; but they have no correct conception of the relative effects upon their health of breathing pure or impure air, nor has their strention ever been called to the importance of keeping their bodies clean and healthy by regular bathing. The eriminality of such neglect in teaching becomes apparent when we consider that the masses ignorantly violating the laws of health, bring upon themestres inches, suffering and death, that might otherwise be avoided. In this condition of things we well of the structure of their own bodies, the laws of bealth, and the importance of occommon schools. Its careful study will enable the healthy to preserve, and the sickly to regain health. Every parent should be prevented, and many a youth saved from a life of shame and literotiouness. The book contains nearly one thousand pages, is proiusely illustrated with colored plates and
